SAHIL KUMAR

Java Full Stack Developer

sahil9955817567@gmail.com +91 8877382998 github.com/SAHI1SINGH linkedin.com/in/sahil-kumar2512 Munger, Bihar

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building production-grade mobile and web applications using Spring Boot, REST APIs, Flutter, MongoDB, and MySQL. Proven ability to deliver end-to-end software solutions following complete SDLC — from requirements gathering and system design to deployment and client support. Experienced in MVC architecture, API testing, root cause analysis, and technical documentation. Seeking a software engineering role focused on quality-driven development and continuous delivery.

WORK EXPERIENCE

Technical Assistant *March 2026 – Present*

Tadoba Solutions Pvt. Ltd., Raipur (Incubated by IBITF, IIT Bhilai)

- Designed, developed, and deployed two production applications — **Tadoba MIS** and **TadobaSolar** — actively used by the company and 1000+ consumers across Chhattisgarh.
- Built Tadoba MIS, a role-based MIS with Admin, Employee, and Sub-Admin roles; implemented task scheduling, FCM push notifications, and role-aware navigation in Flutter.
- Built TadobaSolar, a solar installation tracking app managing consumer lifecycle across 12 sequential steps with document management (Cloudinary), payment tracking, and bilingual (Hindi/English) support.
- Developed Spring Boot backends with MongoDB, implementing RESTful APIs, OTP-based authentication (2Factor), and a PDF proxy endpoint for inline document viewing.
- Collaborated with stakeholders to gather requirements, convert to technical designs, and deliver features on schedule; prepared API documentation, flowcharts, and status reports.

Java Development Intern *July 2025 – Feb 2026*

JSpiders / QSpiders, Noida

- Developed 5+ RESTful APIs using Spring Boot following MVC architecture and OOP design principles.
- Performed thorough API testing and debugging using Postman; participated in code reviews and team standups.
- Analyzed backend module requirements, implemented fixes, and documented resolution steps for team reference.

PROJECTS

Flutter + Spring Boot + MongoDB — Tadoba MIS — Management Information System

- Role-based system with Admin, Sub-Admin, and Employee roles; built separate navigation flows and dashboards per role using Flutter.
- Implemented FCM push notifications displaying task assigner identity; built task scheduling service using MongoDB `@Query` for due-date reminders.
- Added bilingual (Hindi/English) toggle across login and dashboard screens using a centralized `LangProvider`.

Flutter + Spring Boot + MongoDB — TadobaSolar — Solar Installation Tracker

- Built a 12-step solar installation lifecycle tracker with auto-advance logic, serving **1000+ active consumers** across Chhattisgarh with real-time status updates.
- Implemented OTP-based consumer authentication (migrated from Twilio to 2Factor) and deep-link FCM notifications routing users to 4 distinct app screens based on context.
- Designed microservices architecture with 7 services + API Gateway; built a PDF proxy endpoint and Cloudinary integration for secure consumer document management.
- Engineered payment event timeline supporting LOAN and CASH flows with conditional fields, Indian currency formatting, and admin-side approval controls.
- Handled consumer registration, password reset, bilingual (Hindi/English) UI via `LangProvider`, and FCM-based support ticket notifications for the operations team.

TECHNICAL SKILLS

Languages	Java, JavaScript, Dart (Flutter)
Backend	Spring Boot, Hibernate, REST APIs, Maven, MVC Architecture
Frontend	Flutter, React.js, HTML, CSS, Angular (basic)
Database	MySQL, MongoDB
Cloud / Tools	Cloudinary, Firebase FCM, AWS, Hostinger, Git, GitHub, Postman, Eclipse, IntelliJ
Concepts	SDLC, OOP, JDBC, Collection Framework, Exception Handling, Microservices, Linux
Soft Skills	Requirements Analysis, Technical Documentation, Root Cause Analysis, Team Collaboration

EDUCATION

B.Tech — Electronics and Communication Engineering *2025*

Bihar Engineering University, Patna CGPA: 7.89

CERTIFICATION

Full Stack Java Development Certification — QSpiders: 6-month intensive program covering Core Java, Advanced Java, Spring Boot, SQL, Web Development, REST APIs, and real-time project implementation.

ACTIVITIES

- Mentored juniors in Java programming and backend development concepts.
- Participated in coding challenges and hands-on project-building sessions.
